- Translated Figma designs into **responsive**, high-fidelity UI across desktop and mobile.
- Developed interactive dashboards using **ReactJS, NodeJS, and Apache ECharts**.
- Played a 60–70% contribution role in building Voxa, a multi-channel engagement platform.
- Implemented backend workflows for validation, campaign automation (SMS, Email, Instagram, Facebook, LinkedIn).
- Integrated **Cron-based scheduling systems** for campaign automation.
- Built reusable UI components deployed across multiple XPX modules.
- Developed Node.js server for automated schema generation from UML inputs.
- Implemented lazy loading and route-based code splitting to improve **performance and scalability**.
- Maintained high-quality documentation and clean, maintainable code.

Project 2: AOF (Agent Orchestration Framework)

- Designed chatbot components for multi-turn, context-aware conversations.
- Integrated backend APIs for real-time validation and workflow execution.
- Built **reusable modular conversation flows** with error handling.
- Developed **UML hierarchical generator** for agent visualization.
- Automated CRUD operations via Flowise agents.
- Created real-time **monitoring dashboards** to track agent activity and API performance.
- Integrated AoF APIs with Flowise to orchestrate backend workflows.

PROJECTS

3D Environment (React + Three.js + Blender) **Live Demo:** Link | **GitHub:** Repository

- Built immersive 3D environment using ReactJS and Three.js.
- Implemented avatar lip-sync animation synchronized with audio.
- Integrated Blender models with web-based rendering pipeline.
- Developed real-time audio-driven animation rendering.

Car Rental Application (MERN Stack) **GitHub:** Repository

- Developed full-stack car rental system using React, Node.js, MongoDB Atlas.
- Implemented secure JWT-based authentication with bcrypt.
- Designed MongoDB schemas with full CRUD functionality.
- Integrated REST APIs using Axios.
- Implemented routing using React Router.
- Built scalable backend architecture using Express.js.

InstaClone (MERN + Cloudinary) **Live Demo:** Link | **GitHub:** Repository

- Built Instagram clone with authentication & social interaction features.
- Implemented user login/signup using JWT.
- Integrated Cloudinary for media upload and storage.
- Developed feed posting, likes, and social engagement features.
